

Section 2

2.08 ENGINEERING:

All plans and specifications submitted to Denver Water for review, comment, and approval of a system extension or modification shall be prepared by, or under the direct supervision of a Professional Engineer licensed by the State of Colorado. Said Professional Engineer shall be responsible for the design, the plans, determining the material specifications and conducting the field survey. All submitted plans and specifications shall bear the Professional Engineer's seal prior to approval for construction.

The Applicant, Contractor, and Professional Engineer associated with said plans shall be responsible for the adequacy and satisfactory performance of the designs and the installation of all items therein, and any failure or unsatisfactory performance of the system, so constructed, shall not be a cause for action against Denver Water. Denver Water does not perform engineering services for any person or entity in connection with its review of plans. Approval of plans by Denver Water signifies only that the plans meet the minimum requirements of these Engineering Standards based upon the information provided to Denver Water by the Professional Engineer and/or Applicant/Contractor and makes no finding, representation, or warranty that the system and associated components such as pumps, motors, valves, and meters will perform any certain function.

If the Professional Engineer responsible for the plans disagrees with any changes made to the submitted plans that may be required by Denver Water as a result of Denver Water's review of the plans, such disagreement must be brought to the attention of Denver Water in writing for resolution prior to the construction of the project set forth in said plans. The seal of the Professional Engineer on plans so corrected and approved for construction will signify that he/she has reviewed, approved and authorized said corrected plans for construction.

A signed letter acknowledging that the provisions of this section have been read and understood by the Applicant, Contractor, and Professional Engineer shall be sent to Denver Water along with other submittals required in 2.07.
